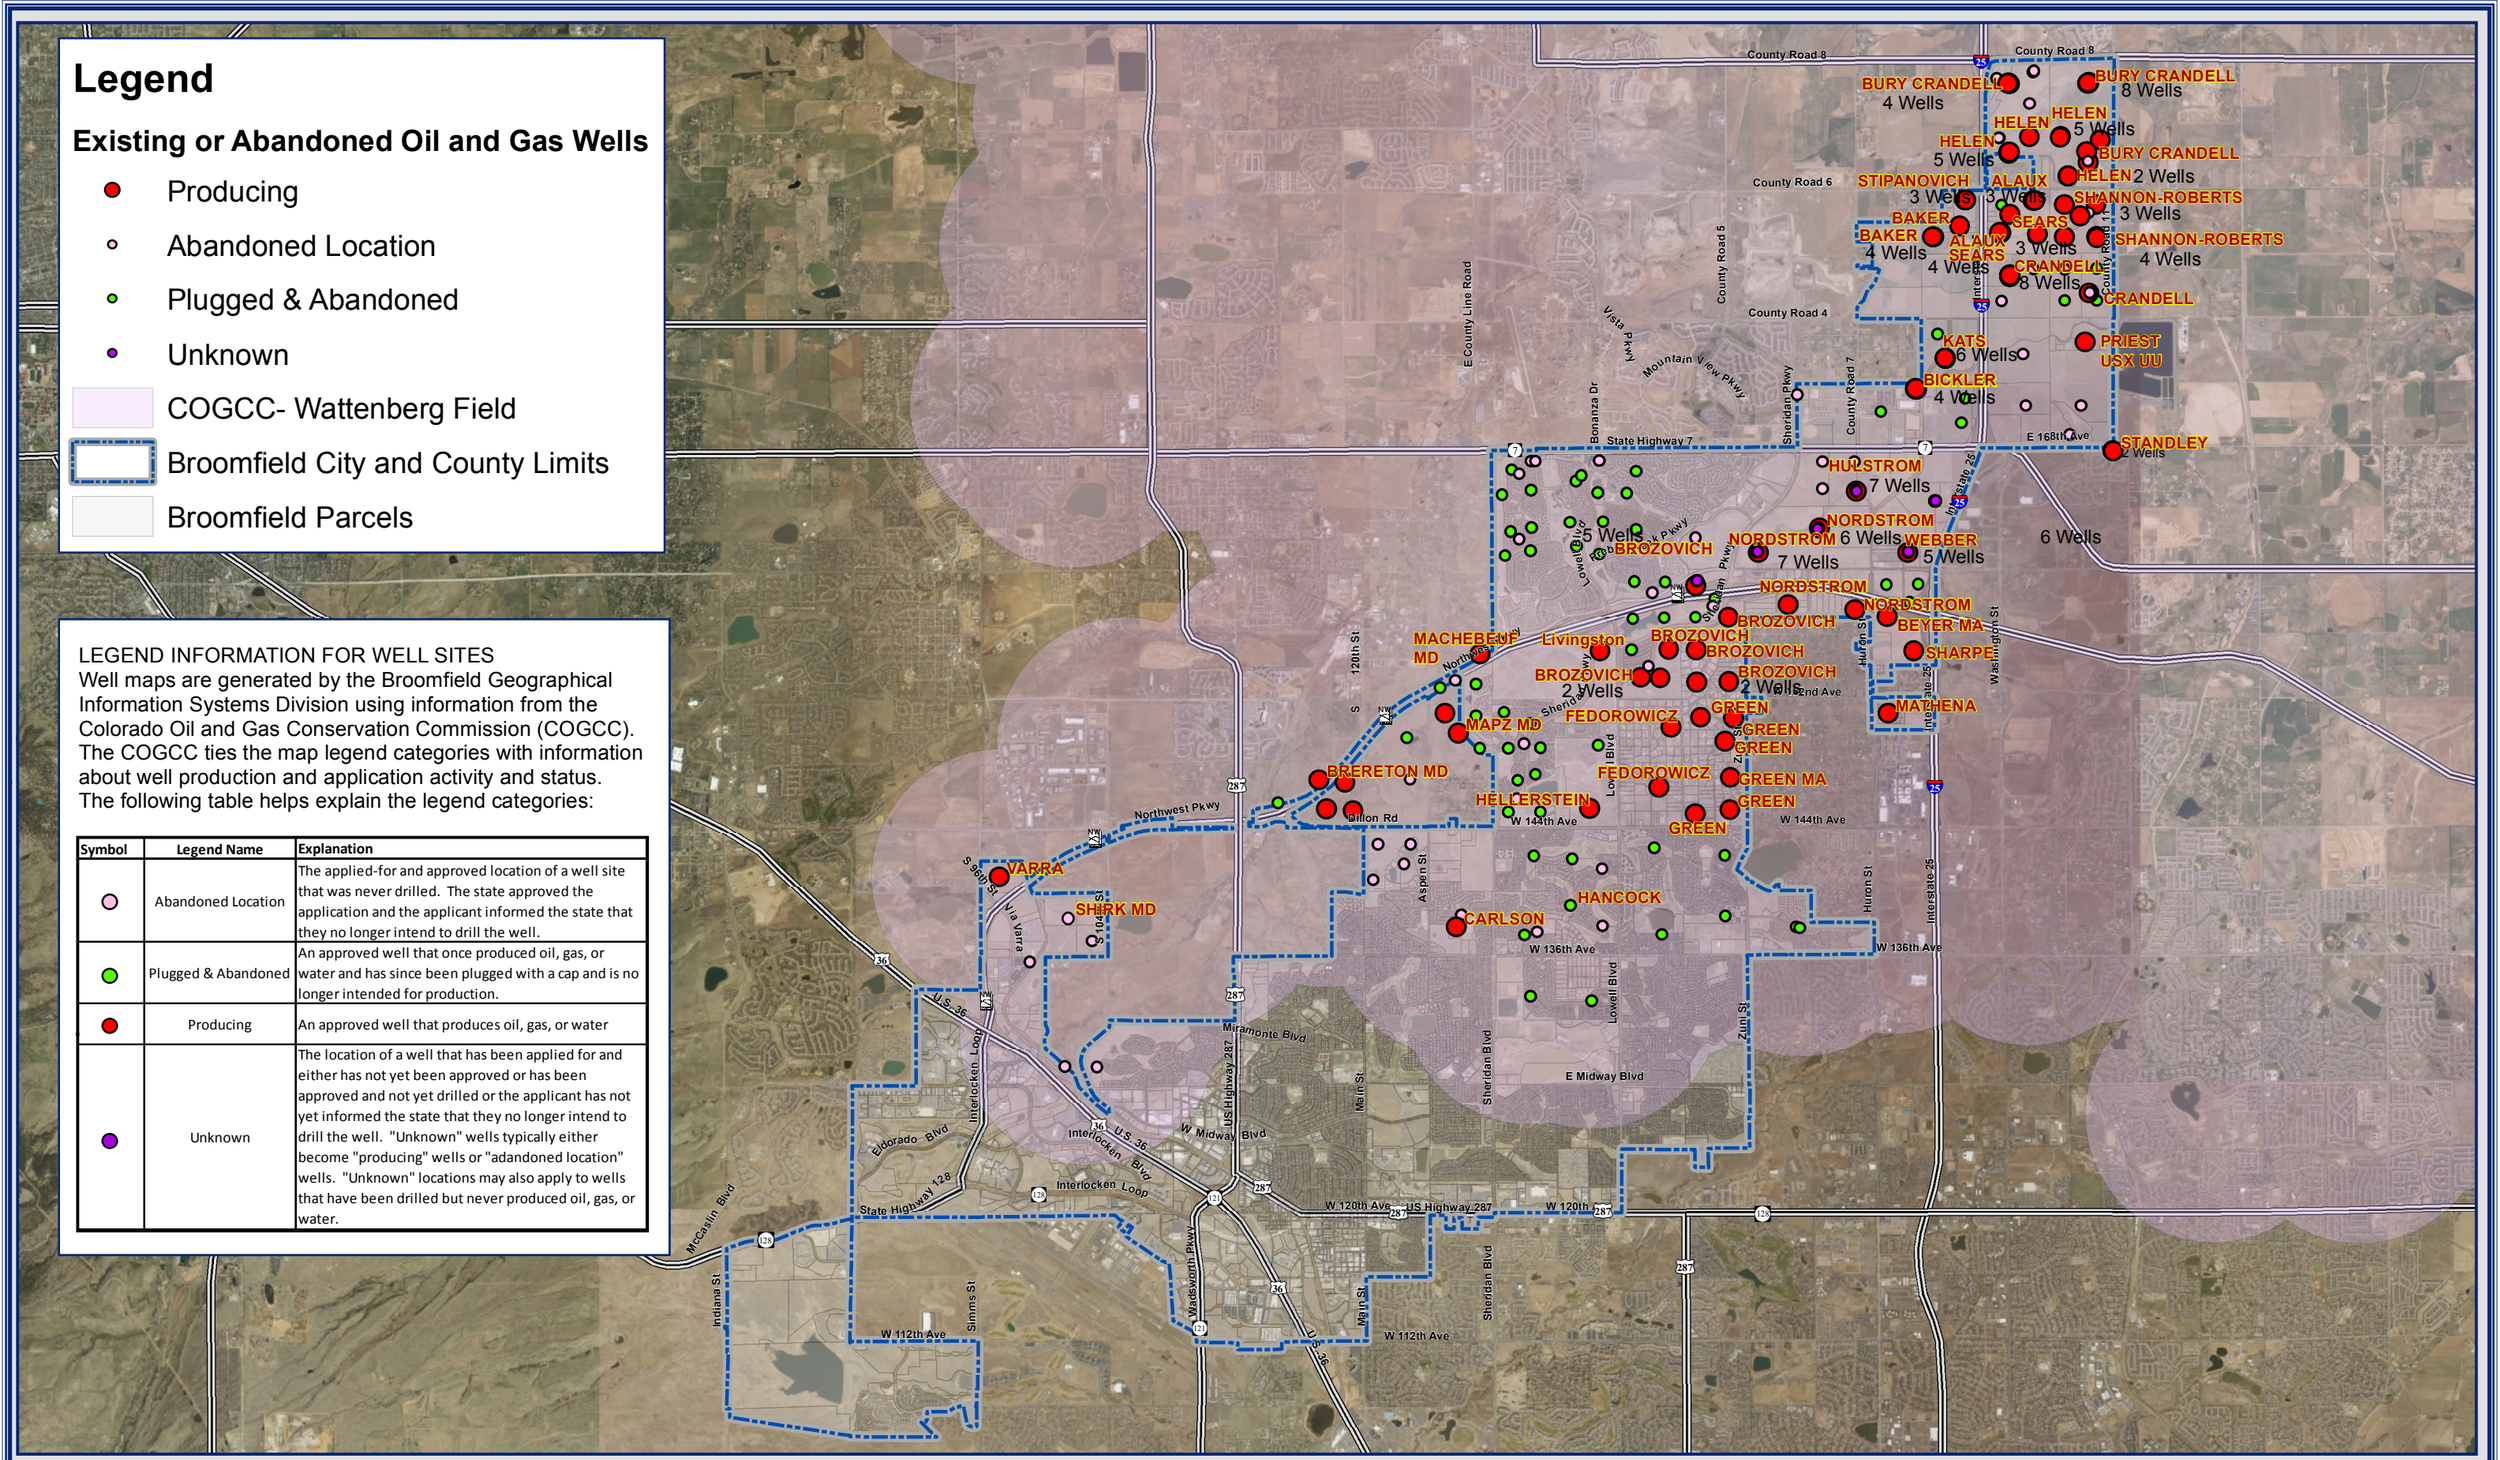
LEGEND INFORMATION FOR WELL SITES
Well maps are generated by the Broomfield Geographical Information Systems Division using information from the Colorado Oil and Gas Conservation Commission (COGCC). The COGCC ties the map legend categories with information about well production and application activity and status. The following table helps explain the legend categories:

Symbol	Legend Name	Explanation
	Abandoned Location	The applied-for and approved location of a well site that was never drilled. The state approved the application and the applicant informed the state that they no longer intend to drill the well.
	Plugged & Abandoned	An approved well that once produced oil, gas, or water and has since been plugged with a cap and is no longer intended for production.
	Producing	An approved well that produces oil, gas, or water
	Unknown	The location of a well that has been applied for and either has not yet been approved or has been approved and not yet drilled or the applicant has not yet informed the state that they no longer intend to drill the well. "Unknown" wells typically either become "producing" wells or "adandoned location" wells. "Unknown" locations may also apply to wells that have been drilled but never produced oil, gas, or water.



The City and County of Broomfield has made every effort to ensure the accuracy of its data. Use of this information is the sole responsibility of the user and The City and County of Broomfield assumes no liability associated with the use or misuse of this information.
