Areas Where New Well Pads are Allowed Consistent with COGCC Setback Regulations*

Broomfield SUA (Surface Use Agreement)

Broomfield City and County Limits

*Map shows the 500 feet distances from occupied buildings as required by COGCC rules, which becomes effective August, 2013.

• There are various other setback requirements and exceptions in COGCC Rule 604, including requirements that no well or production facility shall be located within 1000 feet or less from a high occupancy building unit, like schools, hospitals, children care centers or correctional facilities, within 350 feet of a designated outside activity area, like outdoor recreation areas of playgrounds, sports fields, amphitheaters or other similar place of public assembly. There are also provisions for the Director of the COGCC to grant exceptions to any of these setback requirements. .

LEGEND INFORMATION FOR WELL SITES
Well maps are generated by the Broomfield Geographical Information Systems Division using information from the Colorado Oil and Gas Conservation Commission (COGCC). The COGCC ties the map legend categories with information about well production and application activity and status. The following table helps explain the legend categories:

Symbol	Legend Name	Explanation
○	Abandoned Location	The applied-for and approved location of a well site that was never drilled. The state approved the application and the applicant informed the state that they no longer intend to drill the well.
●	Plugged & Abandoned	An approved well that once produced oil, gas, or water and has since been plugged with a cap and is no longer intended for production.
●	Producing	An approved well that produces oil, gas, or water
●	Unknown	The location of a well that has been applied for and either has not yet been approved or has been approved and not yet drilled or the applicant has not yet informed the state that they no longer intend to drill the well. "Unknown" wells typically either become "producing" wells or "adandoned location" wells. "Unknown" locations may also apply to wells that have been drilled but never produced oil, gas, or water.

The City and County of Broomfield has made every effort to ensure the accuracy of its data. Use of this information is the sole responsibility of the user and The City and County of Broomfield assumes no liability associated with the use or misuse of this information.
